What is Hootling?

Hootling is a mobile-first travel utility that helps international travellers answer two of the most stressful questions on arrival: *"Is this taxi price fair?"* and *"How much should I tip?"* Users arrive at result pages with high purchase intent -- they are actively planning or mid-trip in a specific city.

Audience

- International leisure travellers visiting cities in Southeast Asia, Europe, the Middle East, and North America
- Mobile-first usage -- most sessions occur on iOS and Android during trip planning or on arrival
- High purchase intent -- users look up a fare or tip because they need it right now
- No account required -- zero sign-up friction; users skew toward spontaneous, in-the-moment travel spend
- Multilingual -- full interface in 14 languages: English, Japanese, Thai, Indonesian, Spanish, French, German, and more

How Affiliate Links Are Placed

Affiliate links appear exclusively in a **"Plan your trip"** contextual block, shown directly below a paid result. The placement is destination-specific -- a user who has just checked a Bangkok taxi fare sees Bangkok hotels on Booking.com, Bangkok tours on GetYourGuide, and a relevant Airalo eSIM. No banner ads. No sidebar placements. All links are clearly labelled as partner recommendations.

Partner	Placement	Destination-specific?
Booking.com	After taxi fare result	Yes -- city search pre-filled
GetYourGuide	After taxi fare result	Yes -- city search pre-filled
Airalo	After taxi and tipping results	Link with country context
